

ECO-FRIENDLY & INNOVATIVE

TEXTILES FOR WALL DECORATION

EVERGREEN
ECO-FRIENDLY TEXTILES

TEXTILES THAT RESPECT THE ENVIRONMENT AND HUMAN HEALTH

All EverGreen fabrics are certified :
PVC-free
Phthalate-free
Phosphate free
Glycolether free

The environmental advantage of the EverGreen programme has been validated by a Life Cycle Assessment (LCA) conforming with ISO 14 040 - ISO 14 044 standards.

Dickson Coatings is a French manufacturer of technical textiles offering via its EverGreen collection, a complete range of digitally printable fabrics for interior decoration.

These fabrics enable you to personalize and decorate walls for any kind of indoor use.

DESIGN BY YOU

WALL DECORATION BY DICKSON COATINGS

DIGITALLY PRINTABLE TEXTILES

All EverGreen Fabrics are digitally printable with :
solvent
eco-solvent
UV and
latex inks.

Any decorative style and graphic creation is possible. There is no limit to creativity !

Dickson offer 4 textiles compatible with your projects:

JET TEX CLASSIC : The Original

JET TEX EASY : Two-tone (white/grey), greater opacity

JET TEX COMFORT : Heavier fabric, greater opacity and thicker

JET TEX WALL : Pre-pasted

JET TEX DECO : Pearl finish

References	Bonded Panoramic Installation	Installation in strips	Stretched Installation
JET TEX CLASSIC	◆	◆	◆
JET TEX EASY	◆	◆	◆
JET TEX COMFORT	◆	◆	
JET TEX WALL		◆	
JET TEX DECO	◆	◆	◆

All EverGreen Fabrics are highly flame retardant and meet all essential market standards.

EASY INSTALLATION

EverGreen Fabrics are lightweight and easy to handle. They can be easily installed using one of two methods :

STRETCHED IN A FRAME

This method avoids having to prepare the wall surface and the decor can be changed within a couple of minutes. It is also possible to soundproof the room by inserting a cotton-wool lining between the wall and the fabric

*The sound proof qualities of JET TEX are certified by the CSTB

EverGreen fabrics can be used to improve accoustics by inserting sound proof wadding behind the fabric

UNRIVALLED AESTHETICS

Vivid colour renderings and superb contrasts !

The textile aspect and quality finishing that reduces shine, creates a refined look and feel.

USING WALLPAPER ADHESIVE

Coat the wall with adhesive then roll on the EverGreen Fabric.

The adhesive method can be used with strips of EverGreen fabric. Our fabrics fit perfectly thanks to their dimensional stability. There will be no shrinkage after drying.

Panoramic mounts are possible with the production of wide width fabrics (up to 3.20m/126") using a single roll. No seams are necessary. The final rendition is picture perfect!
